Zalongwa Version 2.0

WHAT IS NEW

After going through testing and evaluation phase of Zalongwa software, the following comments were made:

1. *The Room Application Registration Form* (Transactions – Room Application).
   Doesn't register room two and room three. i.e. under proposed rooms, there are three options namely Room one, Room two, and Room three. Zalongwa takes accounts of room one only. It doesn't record room two and room three.

   SOLUTION: *The problem was fixed and tested in Zalongwa Version 2.0*

2. The Report "*Room Application*" prints records for a certain criteria only. We need records from other criteria as well so that we may know for example in which academic year a certain application falls under.

   SOLUTION: *An option was added in the printing room application form. Users are required to specify "Room application criteria and Academic year of which they want to print room application report.*

3. Report Room Allocation
   To print room allocation Report, one needs to specify a year only. But we may need to print room allocation for one particular Hall of residence.

   SOLUTION: *An option of printing room allocation report for particular halls of residences was added in Zalongwa Version 2.0*

4. Zalongwa has no report that informs us about the vacant rooms.
   SOLUTION: *Zalongwa version 2.0 has added a report called "Vacant Rooms".*

HOW TO UPDATE
ZALONGWA VERSION 1.0 TO VERSION 2.0

If you have ZALONGWA Program on Your Computer stored in the folder “C:\Zalongwa”.

- Rename the folder C:\Zalongwa to C:\Zalongwaold.
- Install Zalongwa Program from your installation disk.
- The Installation will replace the old program with the new in C:\Zalongwa.
- If You have Important data in your C:\Zalongwaold folder, copy them to your new program as follows:
    - Delete C:\Zalongwa\LUNGO.MDB
    - Copy C:\Zalongwaold\LUNGO.MDB to C:\Zalongwa\ folder.
- Enjoy Zalongwa Software.

1 INSTALLATION OF THE PROGRAM

ZALONGWA is distributed on self-Extracting files format. These files are packed in one 3.5" Diskette. To install the software into your Computer please follow the following instructions:

1. Insert the installation disk into Drive A:\ of your Computer.
2. Using My Computer or Windows Explorer program, locate Drive A:\ and Double click (Press Enter Key) then Executable file "Zalongwa.exe"
3. The program will ask you to create a directory "C:\Zalongwa" if it is not available, just accept.
4. When the self-extracting program is over, all necessary files needed to run ZALONGWA will be in the Directory C:\Zalongwa. These files are LUNGO.MBD, Trans.ico, Help.html and zalongwa.mde.
5. Create a shortcut icon for the zalongwa.mde on your desktop.

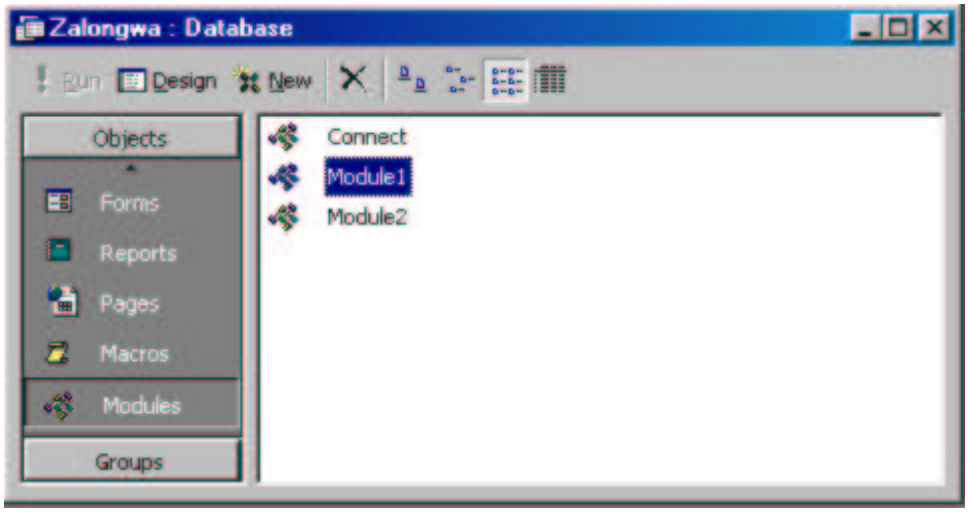
Your Installation is over, you can now start the Program by clicking the "shortcut to zalongwa" icon on the desk to start the Program for the first time.

2 ZALONGWA CONFIGURATION

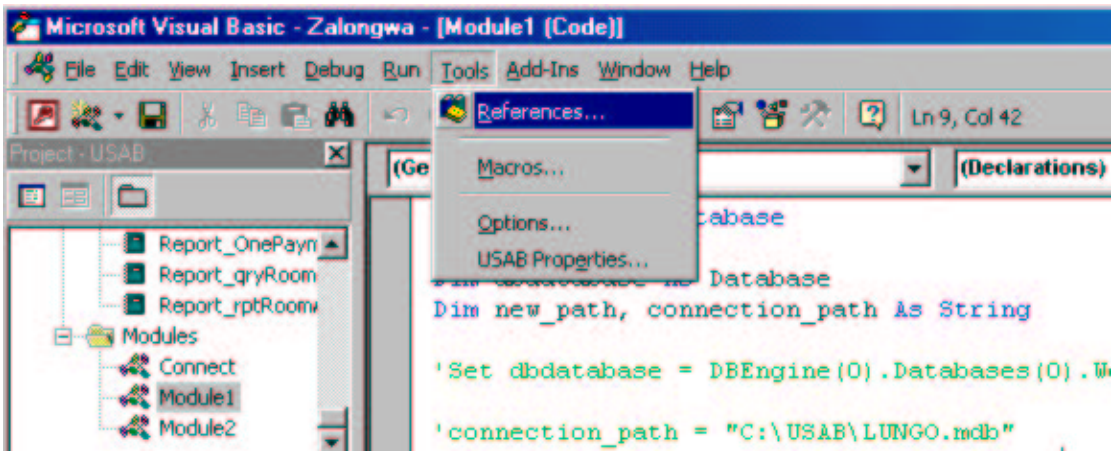
Zalongwa Program uses Microsoft Access 2000 libraries. If you find that your program does not work properly, compile the system:

2.1 Compiling Zalongwa:

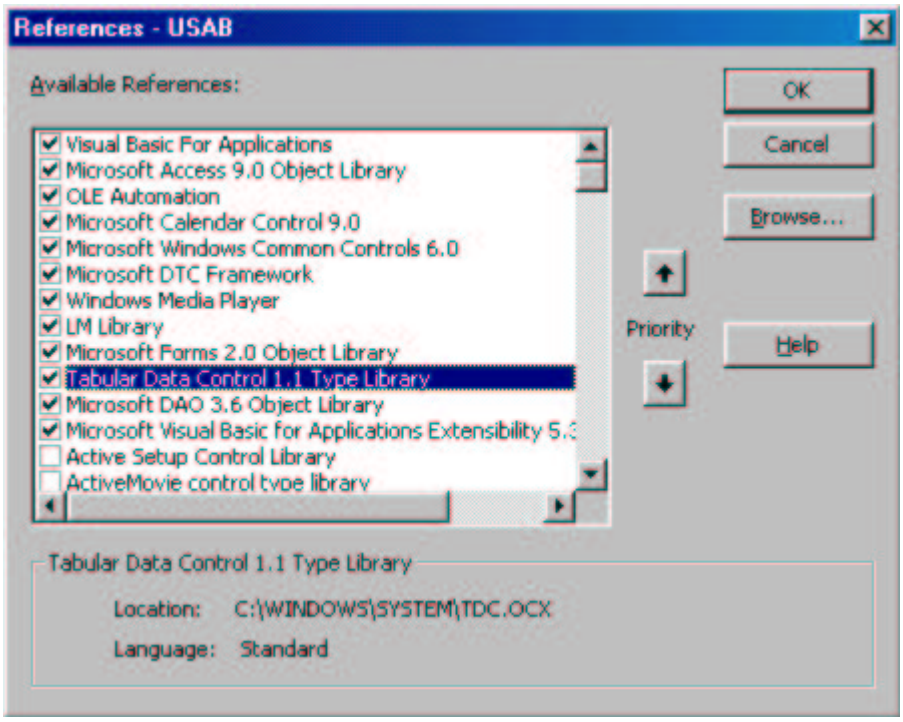
1. Hold down the "Shift Key" continuously while opening Zalongwa by double clicking Zalongwa icon.
2. In Zalongwa Database Window, Select Modules and Open "Module1" file.



3. Microsoft Open "Microsoft Visual Basic – Zalongwa – [Module1 (code)].
4. In the visual basic code application; select "Compile" from Debug menu.



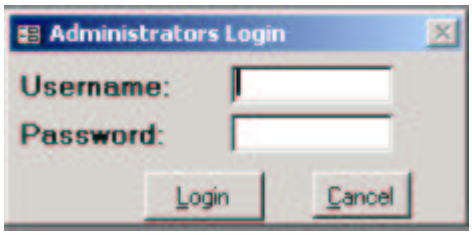
5. If Zalongwa doesn't compile, one of its libraries doesn't work.
6. Select Tools --> References… to display the following window.



For Zalongwa to run properly, all of the above selected Libraries are required. Make sure that they are selected. If they are not installed reinstall them or Uninstall Access 2000 and Re-install MS. Access 2000 with full utilities.

3 GETTING STARTED WITH ZALONGWA

When the system starts, it will display the login screen that requires a user to be identified to the system by typing a username and password.



For the first time the System Administrator will Login by using the following username and password.

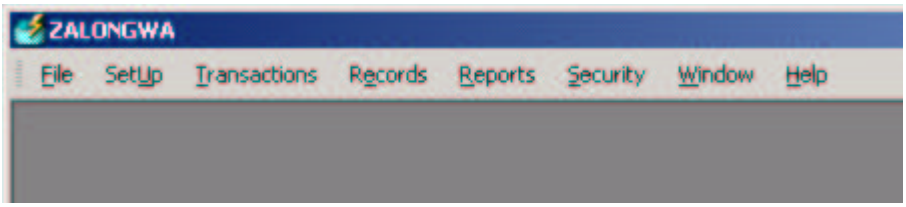
Username: "*admin*"
Password: "*zalongwa*"

This Username and Password is temporary. The System Administrator is strongly advised to remember to add his/her Username and Password immediately through "Security" menu of the Program.

4 ZALONGWA MENU

The program ZALONGWA is a Window based system that was developed in MENU that allows a user to explore the system very easy.

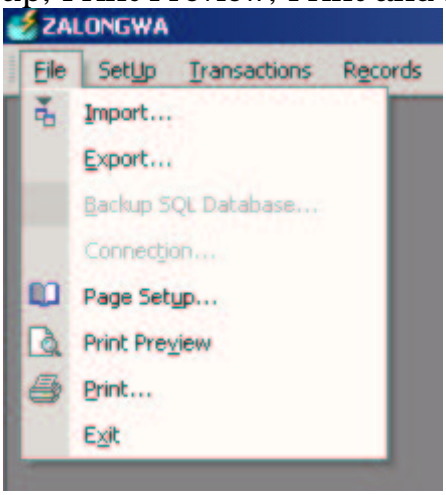
The MENU of ZALONGWA system, consist of the following items:
1. File Menu
2. Setup Menu
3. Transactions Menu
4. Record Menu
5. Reports Menu
6. Security Menu
7. Window Menu
8. Help Menu



Each Menu is a composition of various related Sub-Menus that takes the user to the intended part of the system where he wants to access/use.

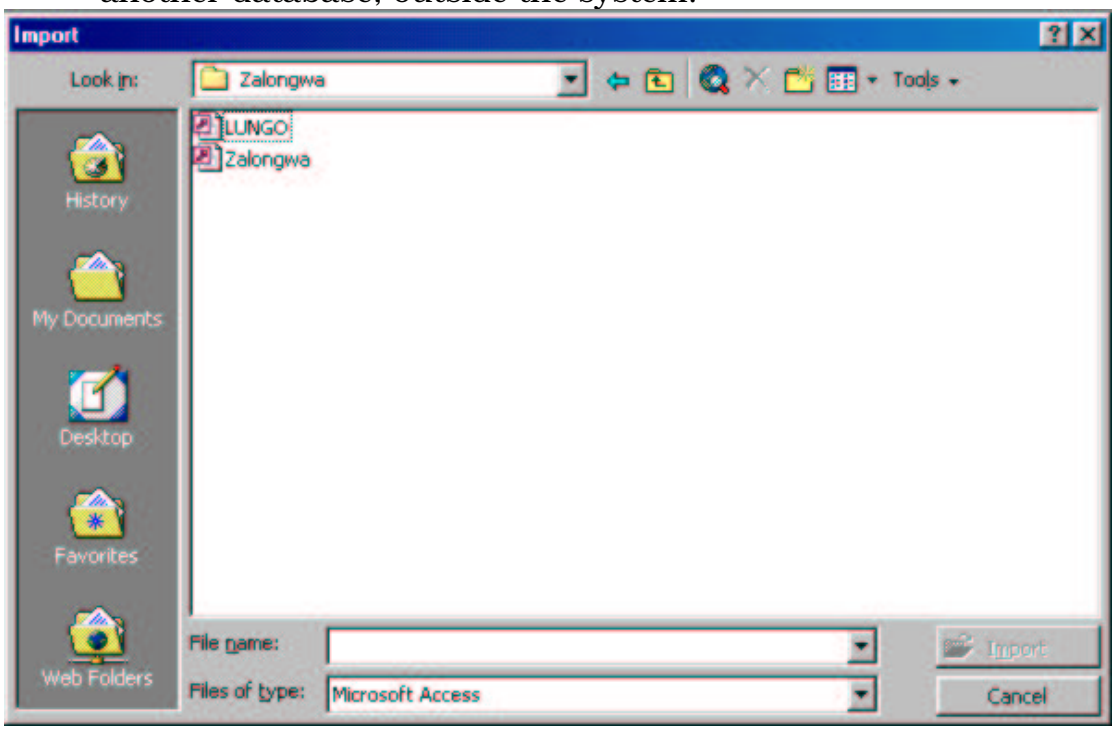
4.1 THE FILE MENU

The File Menu has Sub-menus namely: Import, Export, Backup, Connection, Page Setup, Print Preview, Print and Exit.



4.1.1 Import Menu.

ZALONGWA is an Application Program that works by fetching and putting data from Database. This Menu is intended to allow the user to import Data from another source of data or from another database, outside the system.



4.1.2 Export Menu

This Menu is the opposite side of Export Menu. User may Export Data from the System to another storage device.

4.1.3 Backup

The function of this menu is to make Back Ups of the Database that stores ZALONGWA System. System Administrators are advised to make a backup copy of the database as frequently as possible. Should System Administrator find difficulties in using this command to create backup copies, he/she is advised to use Windows Explore to make copy of the file "LUNGO.MDB" from C:\Zalongwa Directory.

4.1.4 Connection:

This command is used to connect ZALONGWA to its Database (LUNGO.MBD) if disconnect from the database.

4.1.5 Page Setup:

This Command Menu is very useful when one wants to print a Report from ZALONGWA System. Although all reports of ZALONGWA are well designed to fit in "Portrait Format", the system gives flexibility to the User to Print Reports in Landscape format and other types in his/her favorite.

4.1.6 Print Preview:

The command allows users to preview their printouts on screen before printing them into a hard copy.

4.1.7 Print:

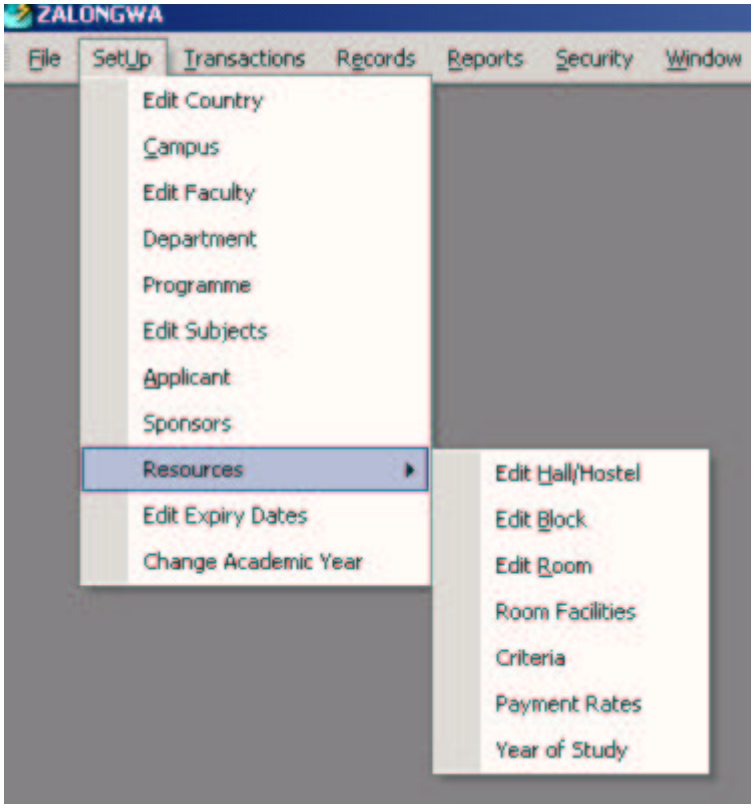
This command tells ZALONGWA to print your report so that you may get a hardcopy.

4.1.8 EXIT:

This Command ends the session of ZALONGWA and closes ZALONGWA system.

4.2 THE SETUP MENU

ZALONGWA program is designed to work into two main RESOURCES namely "Room" and "Occupant". Thus, system requires base data concerning these two Resources before it can be used in Room Reservation. All input functions that are necessary for creating the base data for ZALONGWA are bounded (grouped) in the SETUP Menu.



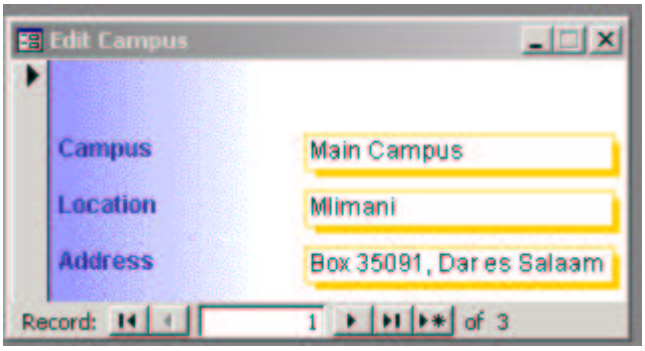
4.2.1 SetUp -- Edit Country:

In Registering Occupant, ZALONGWA requires Country name where the Occupant comes from. The LIST of all countries all over the world in ZALONGWA system is maintained in this Window. Use the Edit Country Command to Add Country name that is not exist in the Country List.

Note: To use Record Operation Commands like Add, Delete, Find, etc, Use the Record Menu.

4.2.2 Setup -- Campus:

Use this command to Edit Campus Records.



Note: To use Record Operation Commands like Add, Delete, Find, etc, Use the Record Menu.

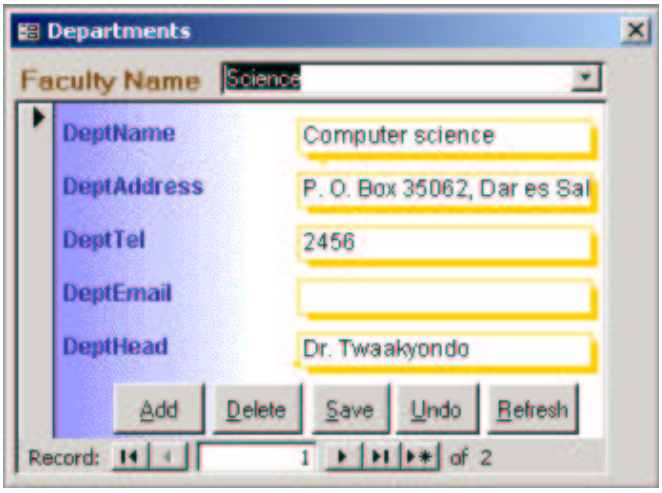
4.2.3 Setup – Edit Faculty:

This Command, allow a user to edit Faculty Records of ZALONGWA System

Note: To use Record Operation Commands like Add, Delete, Find, etc, Use the Record Menu.

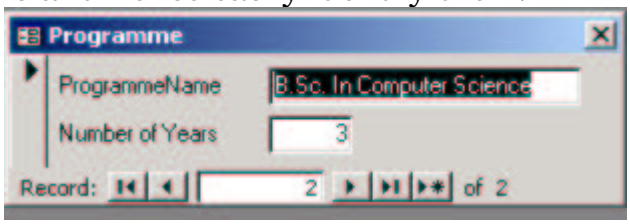
4.2.4 Setup – Department:

The command is used to Edit Departments that are under Each Faculties.



4.2.5 Setup – Programme:

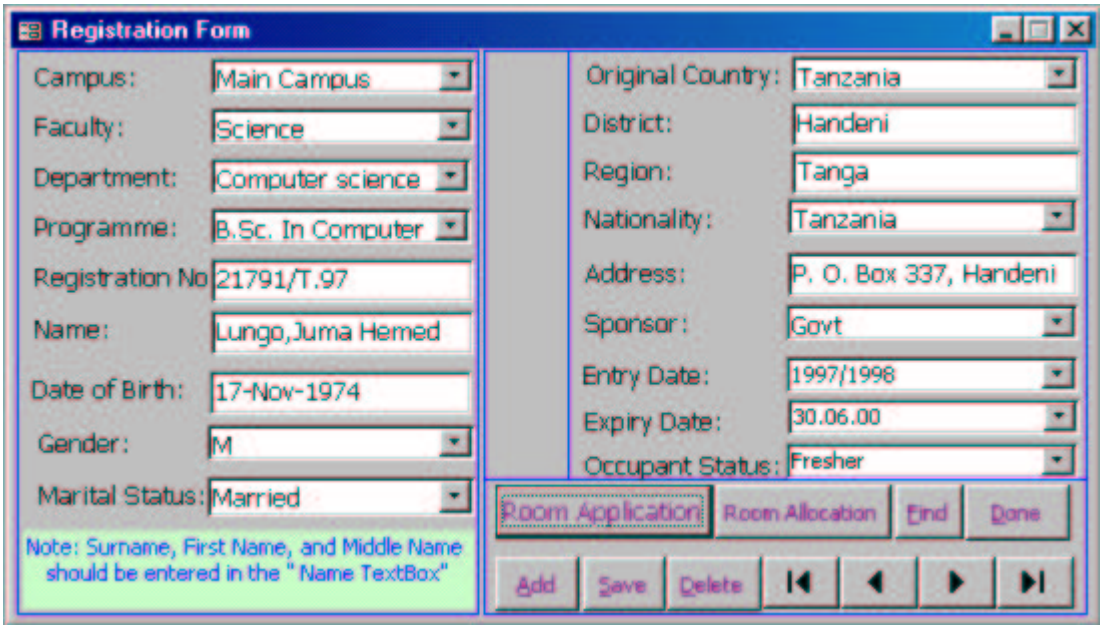
This command retrieves the Program Registration Form that enables a user to add, Edit, delete various Study programme. These programs are important in grouping Applicants Records into programs and hence easily identify them.



Note: To use Record Operation Commands like Add, Delete, Find, etc, Use the Record Menu.

4.2.6 Setup – Applicant:

This command gives the Occupant Registration Form. With form, users are able to register occupants by giving necessary details required.



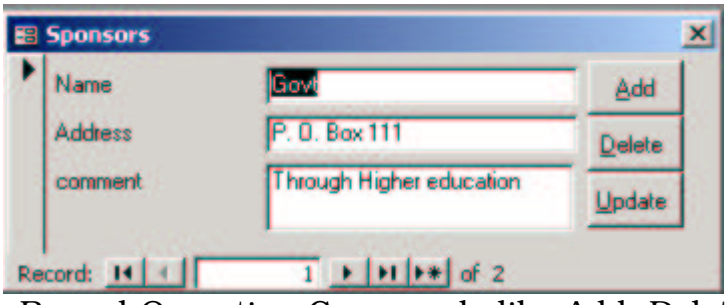
In this form there is "Room Allocation" command that displays a report in which room an applicant has been allocated. The other commands are:

Find: Search a record in the database.
Add: Add a new Record
Delete: Delete a record
Save: Save a record
Done: Closes the form.

Note: To use Record Operation Commands like Add, Delete, Find, etc, Use the Record Menu.

4.2.7 Setup – Sponsor:

Users will use this command to register Sponsors.



Note: To use Record Operation Commands like Add, Delete, Find, etc, Use the Record Menu.

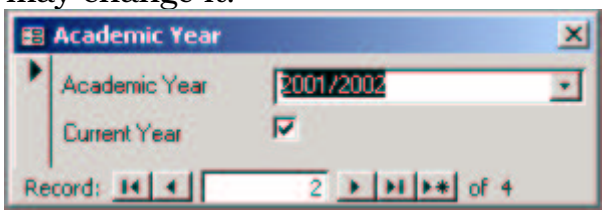
4.2.8 Setup – Edit Expiry Date:

The Command sets up expiry dates. This is important because when registering Occupant, the system requires Expiry Dates. Also this Record is useful in Printing Identity Cards for the Occupant.

Note: To use Record Operation Commands like Add, Delete, Find, etc, Use the Record Menu.

4.2.9 Setup – Change Academic Year:

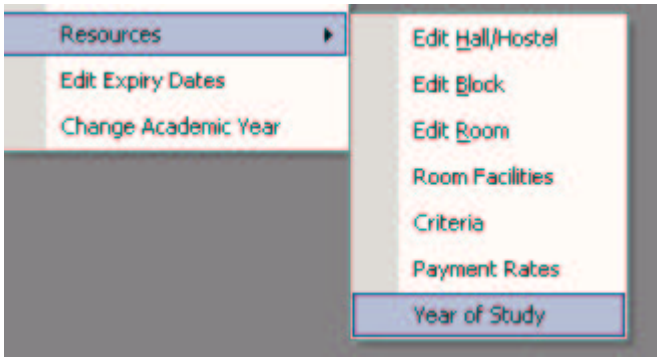
ZALONGWA is time sensitive. It needs to differentiate Records by using Academic Year. In this manner, the system administrator is strongly advised to change the academic years in every fiscal year. This command too can be used to add new academic Year in the future. Application form and Allocation Form Screens display the Current Academic Year. If the display is wrong you may change it.



4.3 ZALONGWA RESOUCES

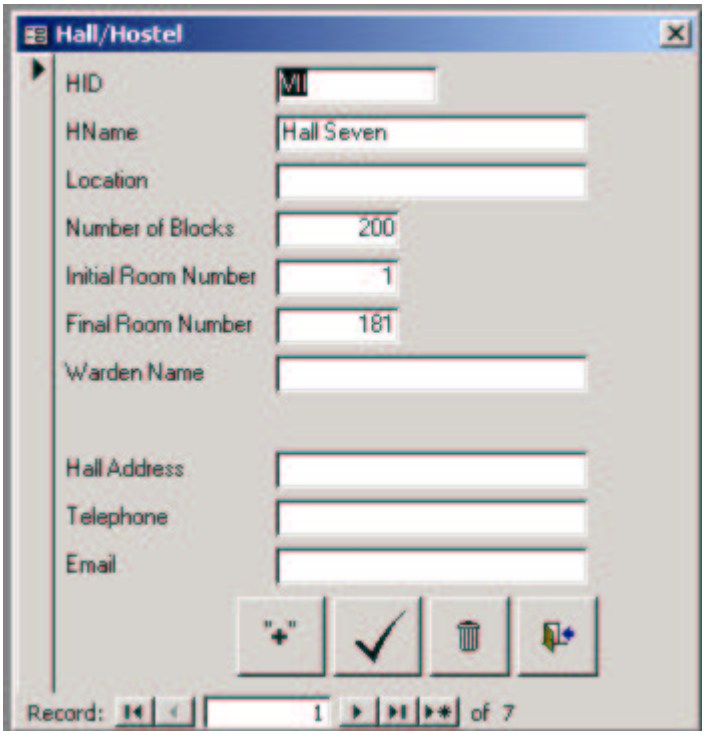
4.3.1 Setup – Resources:

Under this command menu, there are sub-command menus for adding base data of ROOMS. These include:



4.3.2 Edit Hall/Hostel:

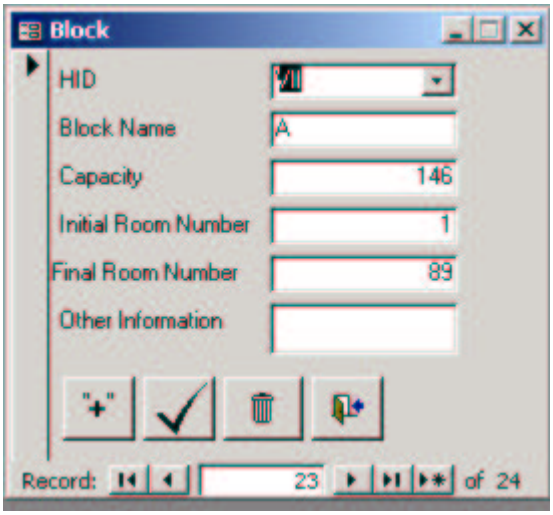
The Command is used to edit Halls and Hostels Records.



The commands included in this form include: Add command (+), Save command (v), Delete command and Close form command. By putting the cursor (pointer) over the commands will display the description of that command.

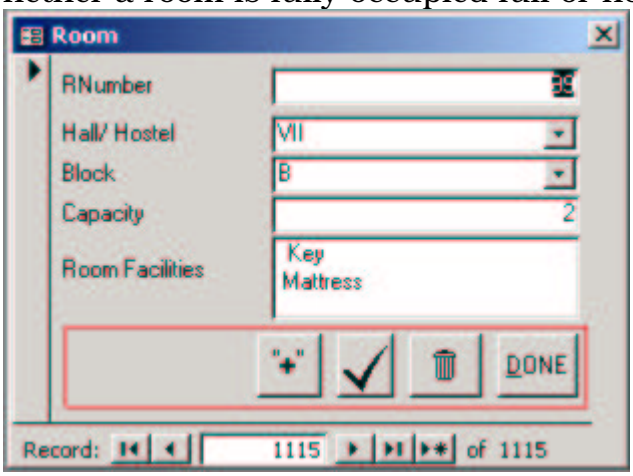
4.3.2 Edit Block:

This command displays a form for registering Block of various Halls as follows.



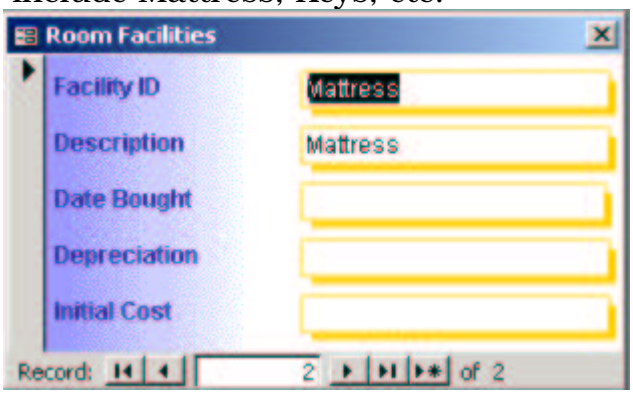
4.3.3 Edit Room:

This command displays the Room Editor where user can register a ROOM and its details. Please note that Room Capacity field is very important since ZALONGWA uses this data to determine whether a room is fully occupied full or not.



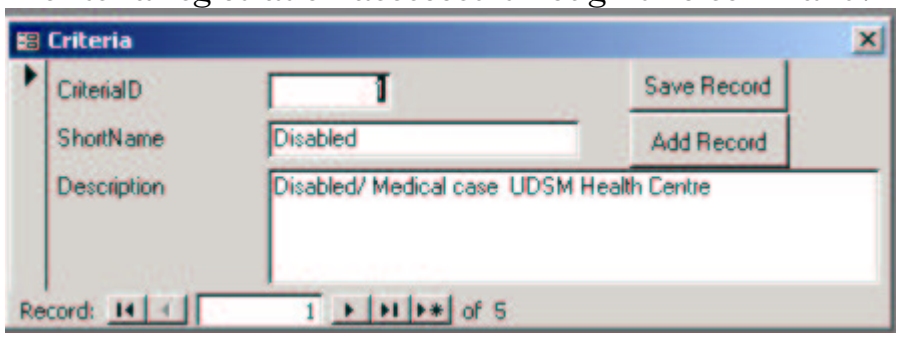
4.3.4 Room Facilities:

This command displays a form for editing Facilities related to a room. These include Mattress, Keys, etc.



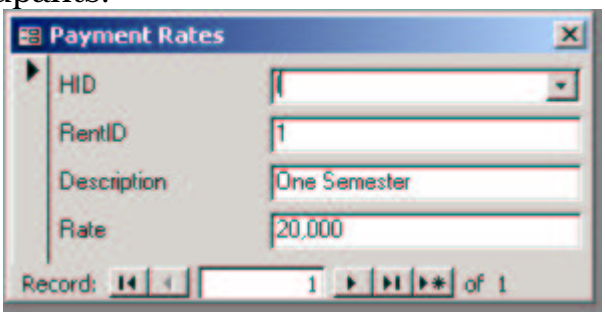
4.3.5 Criteria:

ZALONGWA allocates rooms to occupants by using Room Application Criteria. These criteria are edited through the criteria registration accessed through this command.



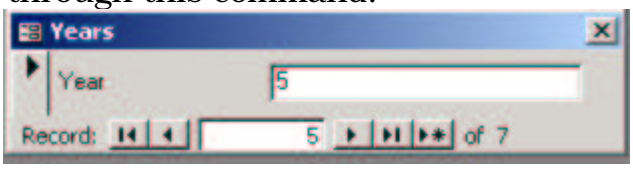
4.3.6 Payment Rates:

These are the Rates for one Semester, two semesters etc. They are important so that ZALONGWA may Calculate Payment Balances of occupants.



4.3.7 Year of Study:

When registering an Occupant, you will need to know in which academic year the applicant is. The list of academic year can be accessed through this command.

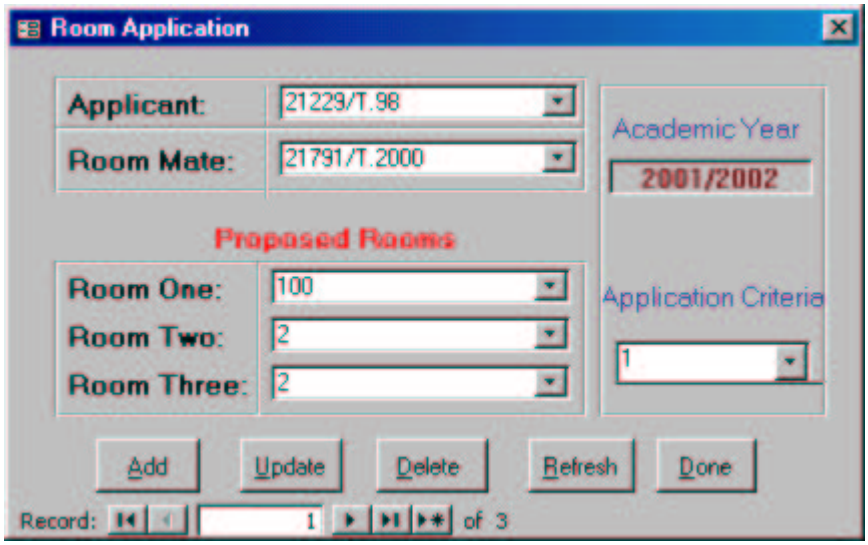


4.4 THE TRANSACTIONS MENUS

The Transactions Menu is composed of Commands for Data Processing in ZALONGWA System. These commands are Room Application, Room Allocation, Payments, Arrivals and Departure.

4.4.1 Room Application:

On clicking this command, a form will appear. This form is mainly used for Editing Room Application



The Room application form has the following fields:

Applicant: - Select an Applicant from the dropdown menu.
You can also type new menu not in the list.

Room Mate: - Select a Roommate of the applicant in the menu list.
You can type new Room Mate not in the list.

Room One: - Enter the applicant's room option number one.

Room Two: - Enter the applicant's room option number Two.

Room Three: - Enter the applicant's room option number Three.

Application Criteria: -Select the application Criteria.

Academic Year: - The field is read only. If the Academic year displayed is not correct, Select Change Academic Year from Setup Menu and Check the appropriate academic year.

The commands:

Add – Add new record.

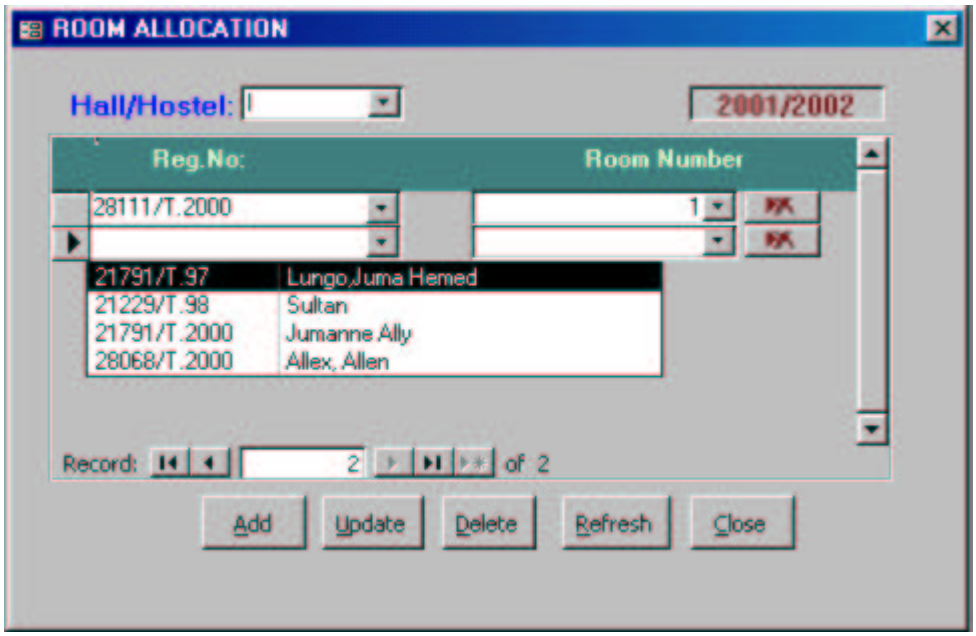
Update – Update/Save changed record

Delete – Delete one record

Refresh – populate new data in the form when the works in network environment

Done – Closes the form

4.4.2 Room Allocation Menu:



The Allocation Form has the following:

Hall/Hostel: - Select Hall of Residence from the drop down list.

Reg.Number: - Select Occupant from the drop down list.

Room Number: - Select Room Numbers from drop down list.

The Room Number list has two columns (Room Number and Room Capacity). The Room Capacity tells how many beds are installed in the room. If the Room Capacity is not reflect the real situation (number of beds) in the room change it in Setup, Resources -->Room

The commands:

Add – Add new record.

Update – Update/Save changed record

Delete – Delete one record

Refresh – populate new data in the form when the works in network environment

Close– Closes the form

4.4.3 Payment Menu:

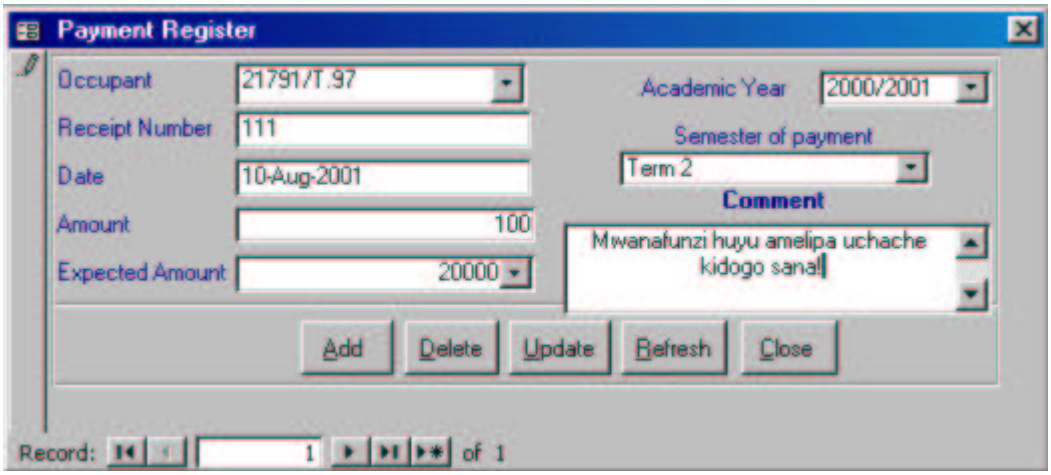
This command display Payment Register form, which contains several text fields to be filled by system user.

Occupant: Enter the registration number of the occupant you are registering. The system accepts only occupants who have allocated a room. It assumes that, an occupant that has no room, his/her name will not appear in the dropdown list and hence is not eligible to pay.

Receipt Number:

Enter the receipt number on this field.

Date: Enter the date of the Receipts
Amount: Enter the amount paid as indicated in the list.
Expected Amount: Select the valid amount expected from the list. Zalongwa need this information in order to calculate balances of the individual occupant.

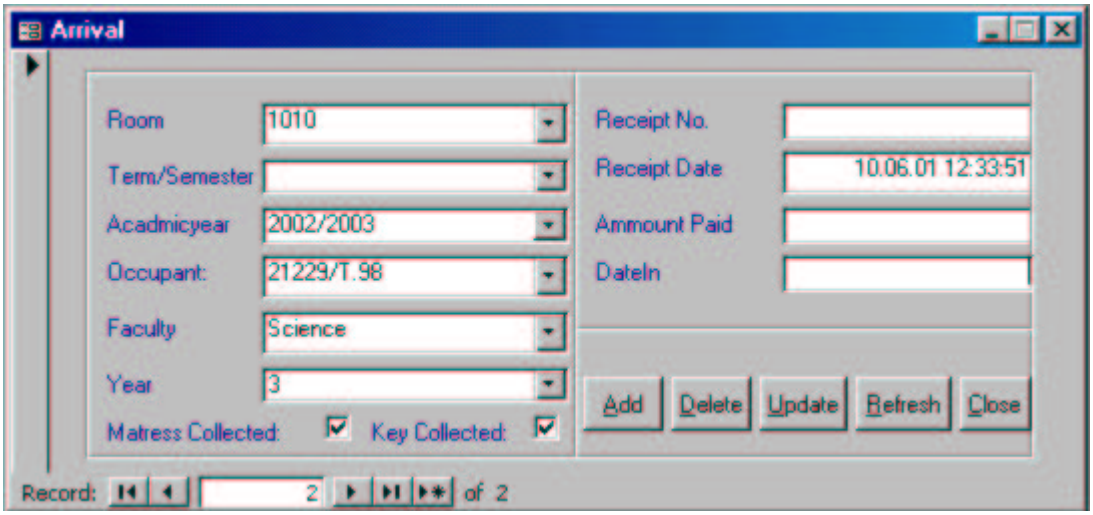


Academic Year: Enter the academic year as indicated in the list.
Semester of payment: Select which semester the occupant has paid for.
Comments: Make any individual comments about the customer if any.

The commands:
Add – Add new record.
Update – Update/Save changed record
Delete – Delete one record
Refresh – populate new data in the form when the works in network
environment
Close– Closes the form

4.4.4 Arrival Menu:

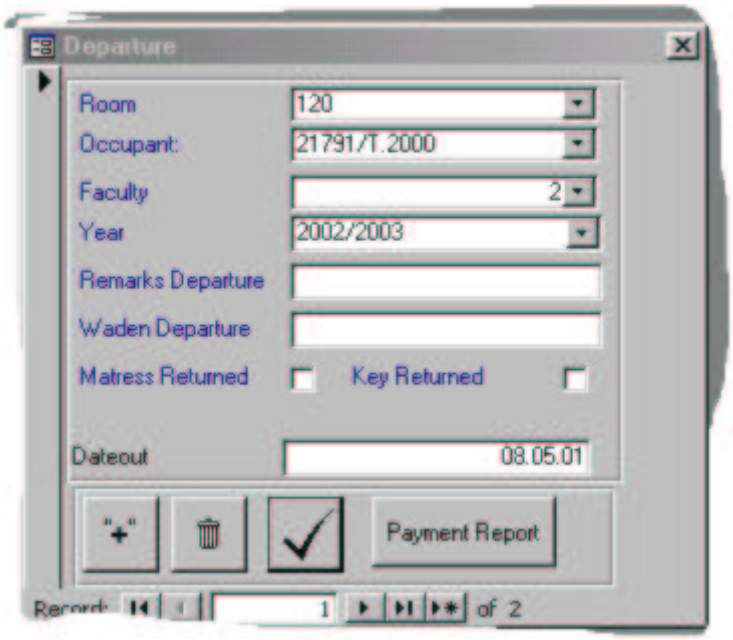
This menu displays a form for registering student when they come back from short holidays (between semester).



4.4.5 Departure:

The departure form is used for registering occupant when he/she vacates from the room.

The commands shown on the form are Add (+), delete and Save command.

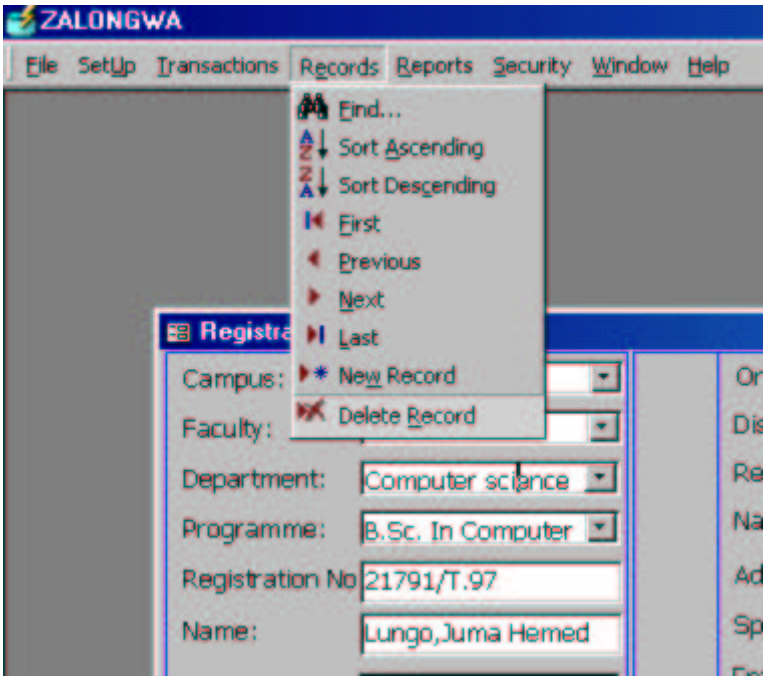


Room: Enter Room number from the drop down list.
Occupant: Select occupant from the drop down list.
Faculty: Enter the faculty in which the occupant has enrolled.
Year: Select the academic year the occupant departed
Remarks Departure: Write any remarks concerning the occupant.
Warden Departure: Enter name of the Warden inspecting the Occupant.
Mattress Returned: Tick the check box by clicking once if the occupant has returned the mattress.

Key Returned: Tick the check box if occupant has returned the Key
Date out: Write down the occupant left. Zalongwa put the current date, check if it is Correct.

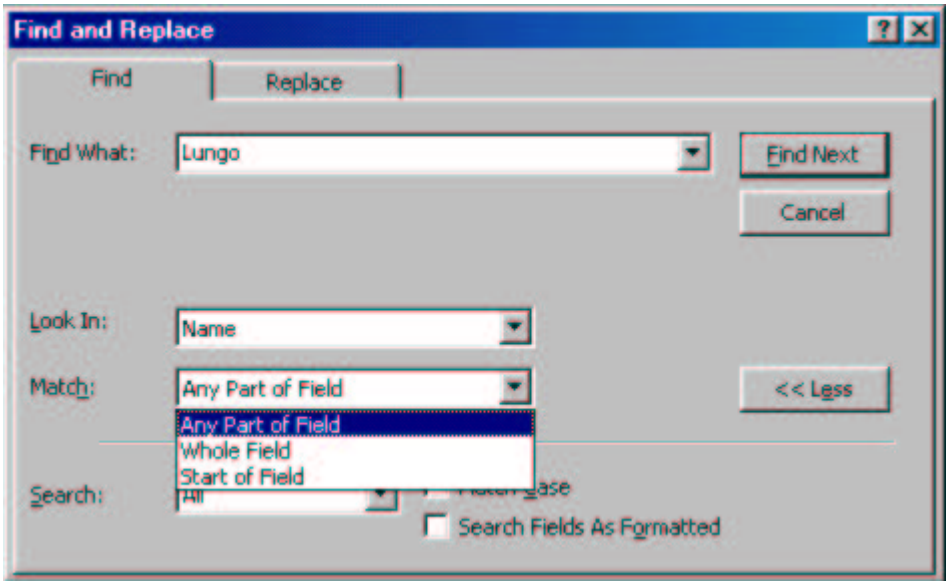
4.5 THE RECORD MENU

The menus are all record operation commands. They become active when a window is opened. When the user opens a window which has no command batons, the user can use this menu to view all operations necessary for manipulating records like Add, Save, Update, Delete, …



4.5.1 Find:

This command is very useful in finding a specific record. To search for a record in a particular field, put the cursor in that field and click find from the record menu. For example to search for a record by using Name put the cursor in the name field and click find.



Find What: Type the name of the record.

Look In: Leave this field as it is because you want to search a record in the entire database using that field.

Match: Select "Any Part of Field" option so that you don't need to remember the whole name, just part of the record menu is enough for you to search.

4.5.2 Sort Ascending:

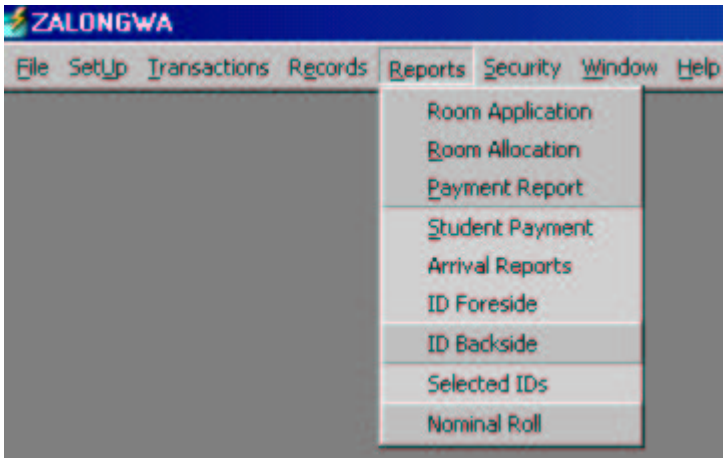
Sort the record in the whole database in ascending order, using the field where the cursor is currently inserted. To sort the record of occupants in ascending order using Registration Number, put the cursor in the text box "Registration Number" and Click Sort Ascending.

4.5.3 Sort Descending:

It is the opposite of Sort Ascending command.
First: Move to the first Record.
Previous: Move to the previous record.
Last: Move to last record.
New Record: Works as Add command to add new record.
Delete Record: Deletes the current record.

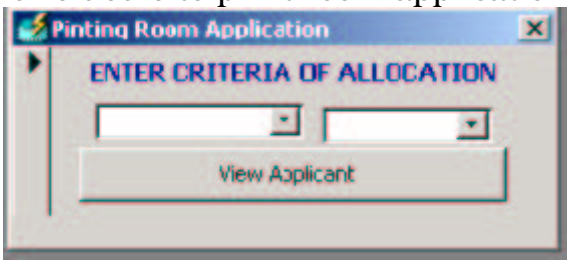
4.6 THE REPORTS MENUS

All commands for generating reports in Zalongwa are located in this menu. The reports that are produced by Zalongwa have similar names to the same commands.

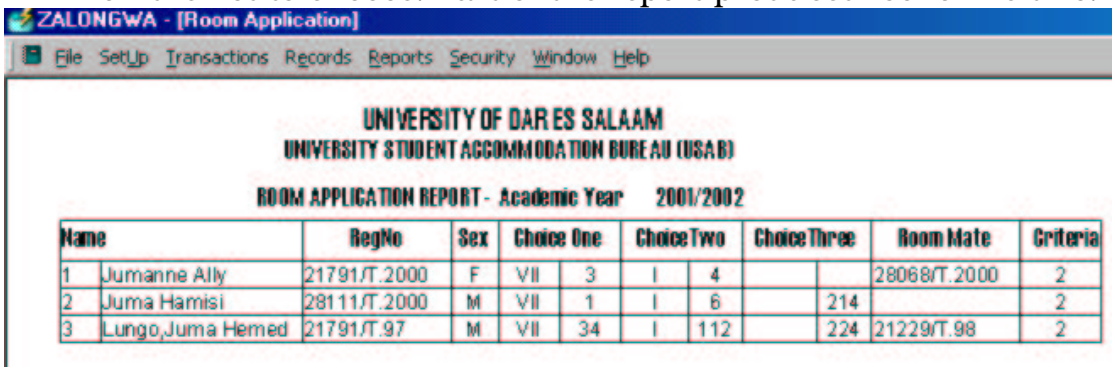


4.6.1 Room Application:

This command allows users to print room application reports.



A user will be asked to specify which report is intended to be produced by Zalongwa. Zalongwa gives five (5) options on the list to choose. Part of the report produced looks like this:



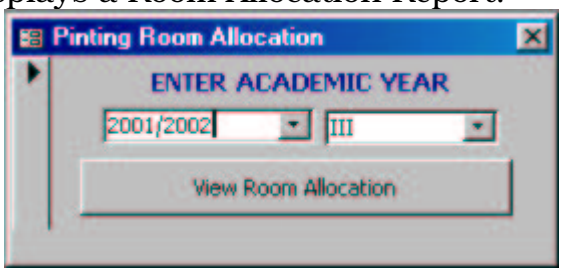
ZALONGWA - [Room Application]
File SetUp Transactions Records Reports Security Window Help
UNIVERSITY OF DAR ES SALAAM
UNIVERSITY STUDENT ACCOMMODATION BUREAU (USAB)
ROOM APPLICATION REPORT - Academic Year 2001/2002

	Name	RegNo	Sex	Choice One		Choice Two		Choice Three		Room Mate	Criteria
1	Jumanne Ally	21791/T.2000	F	VII	3	I	4			28068/T.2000	2
2	Juma Hamisi	28111/T.2000	M	VII	1	I	6		214		2
3	Lungo,Juma Hemed	21791/T.97	M	VII	34	I	112		224	21229/T.98	2

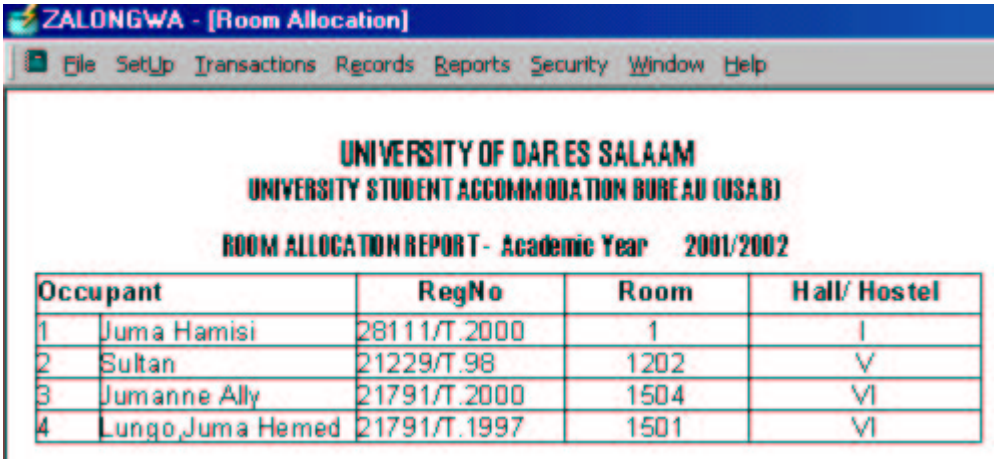
To print the report, use “print” command in the File menus.

4.6.2 Room Allocation:

The command displays a Room Allocation Report.



Select Academic year of which you want to print room allocation report.

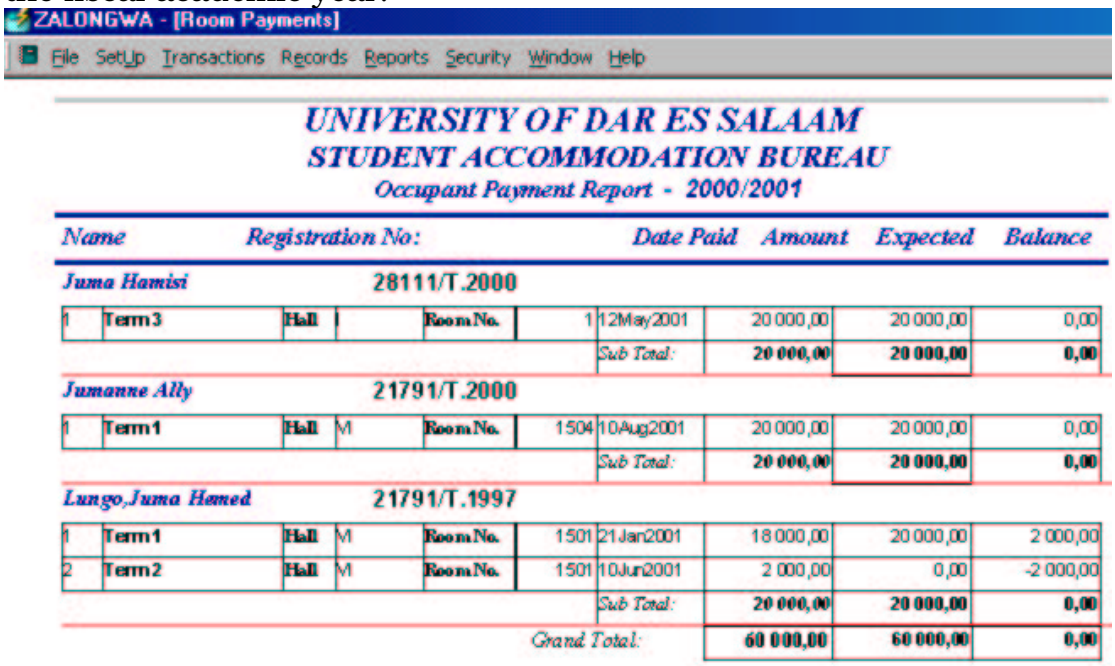


ZALONGWA - [Room Allocation]
File SetUp Transactions Records Reports Security Window Help
UNIVERSITY OF DAR ES SALAAM
UNIVERSITY STUDENT ACCOMMODATION BUREAU (USAB)
ROOM ALLOCATION REPORT - Academic Year 2001/2002

	Occupant	RegNo	Room	Hall/ Hostel
1	Juma Hamisi	28111/T.2000	1	I
2	Sultan	21229/T.98	1202	V
3	Jumanne Ally	21791/T.2000	1504	VI
4	Lungo,Juma Hemed	21791/T.1997	1501	VI

4.6.3 Payment Report

Select this command to print the payment report for the whole academic year. Note: the report displayed here is for all occupants in the fiscal academic year.



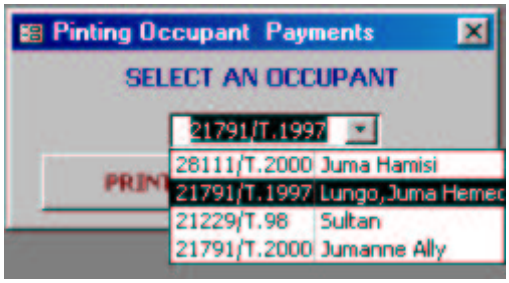
ZALONGWA - [Room Payments]
File SetUp Transactions Records Reports Security Window Help
UNIVERSITY OF DAR ES SALAAM
STUDENT ACCOMMODATION BUREAU
Occupant Payment Report - 2000/2001

Name	Registration No:					Date Paid	Amount	Expected	Balance
Juma Hamisi	28111/T.2000								
1	Term3	Hall		Room No.	1	12May2001	20 000,00	20 000,00	0,00
						Sub Total:	20 000,00	20 000,00	0,00
Jumanne Ally	21791/T.2000								
1	Term1	Hall	M	Room No.	1504	10Aug2001	20 000,00	20 000,00	0,00
						Sub Total:	20 000,00	20 000,00	0,00
Lungo,Juma Hemed	21791/T.1997								
1	Term1	Hall	M	Room No.	1501	21Jan2001	18 000,00	20 000,00	2 000,00
2	Term2	Hall	M	Room No.	1501	10Jun2001	2 000,00	0,00	-2 000,00
						Sub Total:	20 000,00	20 000,00	0,00
						Grand Total:	60 000,00	60 000,00	0,00

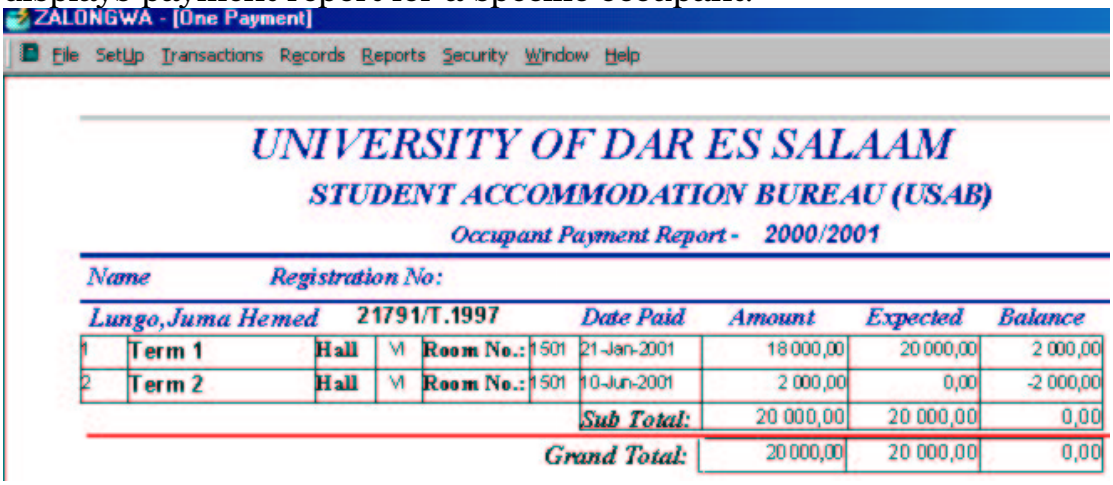
The names of occupants in the report are sorted alphabetically.

4.6.4 Occupant Payment

Sometime users may want to keep track on individual payments of occupants.



This command facilitates this by displaying a list of all applicants and displays payment report for a specific occupant.

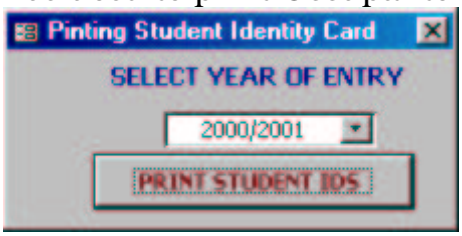


ZALONGWA - [One Payment]
File SetUp Transactions Records Reports Security Window Help
UNIVERSITY OF DAR ES SALAAM
STUDENT ACCOMMODATION BUREAU (USAB)
Occupant Payment Report - 2000/2001
Name Registration No:
Lungo,Juma Hemed 21791/T.1997
Date Paid Amount Expected Balance
1 Term 1 Hall VI Room No.: 1501 21-Jan-2001 18 000,00 20 000,00 2 000,00
2 Term 2 Hall VI Room No.: 1501 10-Jun-2001 2 000,00 0,00 -2 000,00
Sub Total: 20 000,00 20 000,00 0,00
Grand Total: 20 000,00 20 000,00 0,00

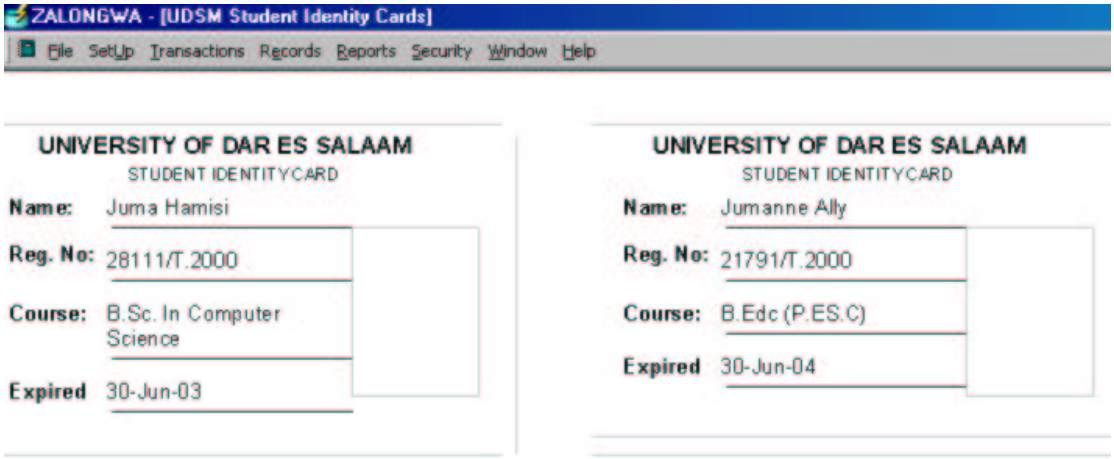
With this report one may see the trends of occupant payments.

4.6.5 ID Foreside:

Zalongwa system can be used to print Occupants Identity Cards.



This command prints the foreside of the Identity cards that is characterised by occupant information like Name, Course of study and Expiry date.



Zalongwa simplify a lot the process of printing Student Identity Cards in Schools. It produces Eight (8) cards per A4 and therefore the program is very economical.

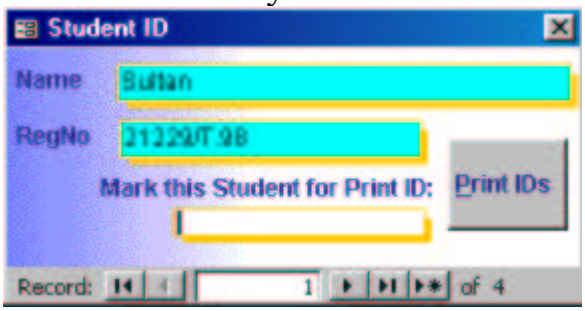
4.6.6 ID Backside:

This command Prints the backside of the Identity Cards.

ZALONGWA - [IDNyuma : Report]
File SetUp Transactions Records Reports Security Window Help
UNIVERSITY OF DAR ES SALAA
1 Disciplinary action will be taken against a student who fails to present the card when requested to
2. This card must be returned to the Dean of Students on terminating the Course
3. Non-transferable
STUDENT'S SIGNATURE
UNIVERSITY OF DAR ES SALAA
1 Disciplinary action will be taken against a student who fails to present the card when requested to
2. This card must be returned to the Dean of Students on terminating the Course
3. Non-transferable
STUDENT'S SIGNATURE

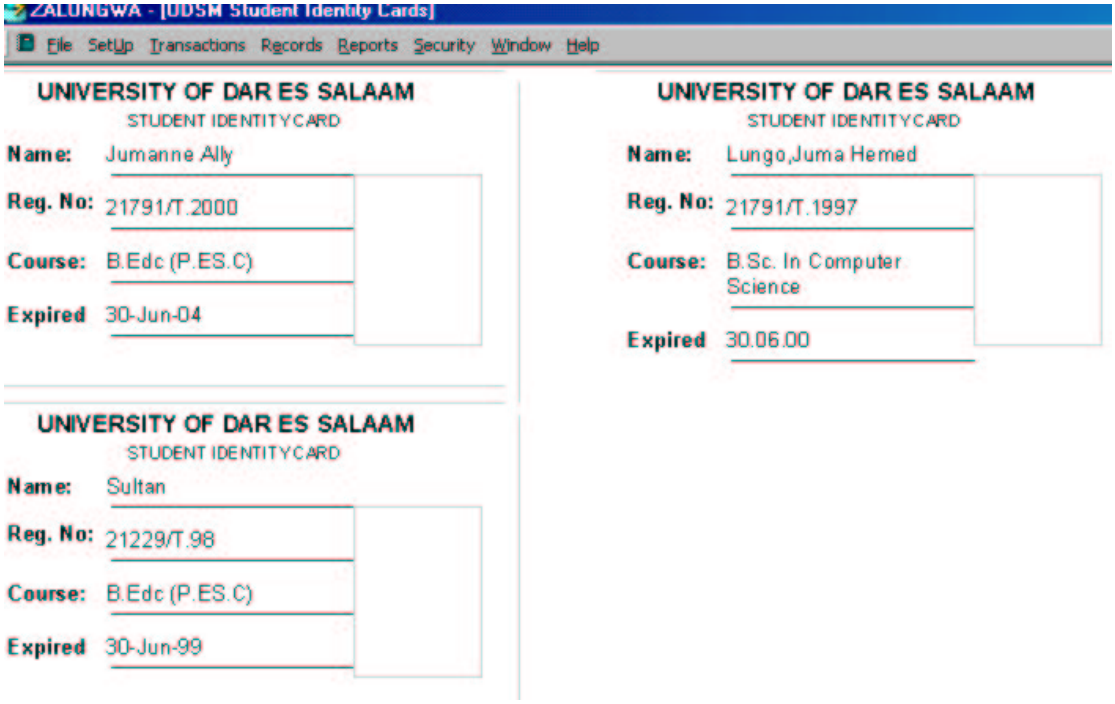
4.6.7 Selected ID:

The ID Foreside command prints all Identity Cards for the Selected Academic Year. This means it prints Identity Cards for all occupants who were enrolled in the selected year.



Selected command is used to print specific identity cards. To use this command, one should mark all occupants with the same mark. Zalongwa will find all marked occupants and prints their identity cards.

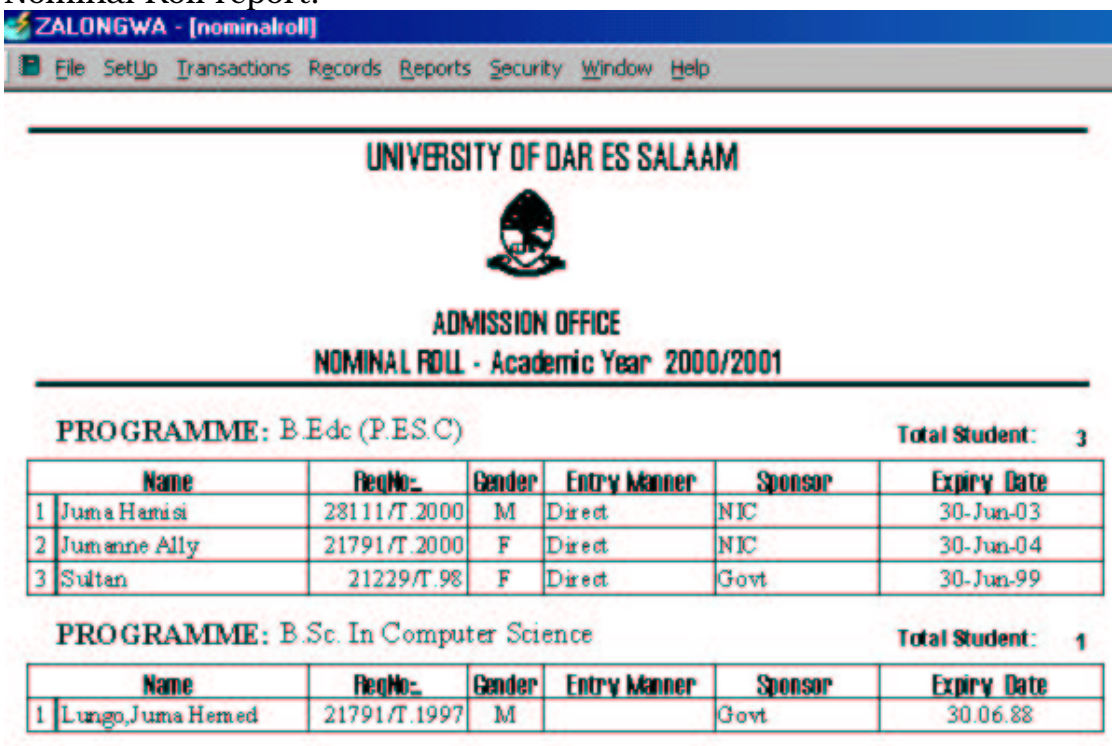
For example, by marking three occupants with a marker like “1”, Zalongwa will print the identity cards for these occupants as follows:



In this way Zalongwa can also accommodate cases like Identity card lost and also it can print Identity cards for late registration. The ID Backside command will print the backside of these cards.

4.6.8 Nominal Roll:

This report command allows Zalongwa to print Nominal Roll. Nominal Roll is a very important report. It is where users can tell how many occupants they have in that academic year. It displays the occupants in the categories of Study Programme. The following is the sample of Nominal Roll report.



ZALONGWA - [nominalroll]
File SetUp Transactions Records Reports Security Window Help
UNIVERSITY OF DAR ES SALAAM
ADMISSION OFFICE
NOMINAL ROLL - Academic Year 2000/2001
PROGRAMME: B.Edc (P.ES.C)
Total Student: 3
Name | RegNo:_ | Gender | Entry Manner | Sponsor | Expiry Date
1 Juma Hamisi | 28111/T.2000 | M | Direct | NIC | 30-Jun-03
2 Jumanne Ally | 21791/T.2000 | F | Direct | NIC | 30-Jun-04
3 Sultan | 21229/T.98 | F | Direct | Govt | 30-Jun-99
PROGRAMME: B.Sc. In Computer Science
Total Student: 1
Name | RegNo:_ | Gender | Entry Manner | Sponsor | Expiry Date
1 Lungo,Juma Hemed | 21791/T.1997 | M | | Govt | 30.06.88

In each category the names of occupants are sorted alphabetically.

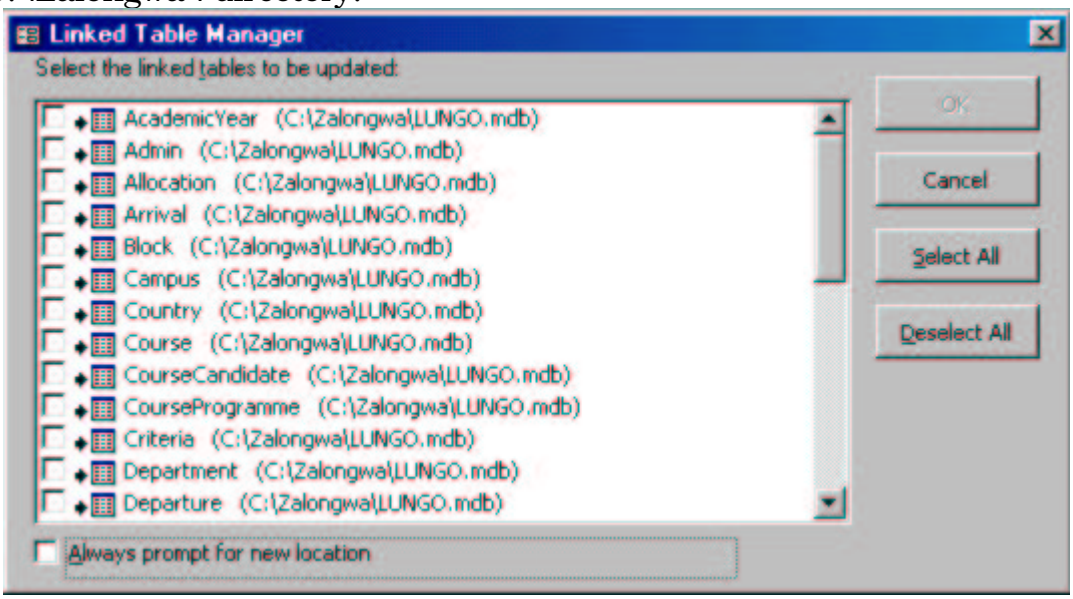
5 THE SECURITY MENUS

The menu has two important commands, Connect Database Files and Edit User.

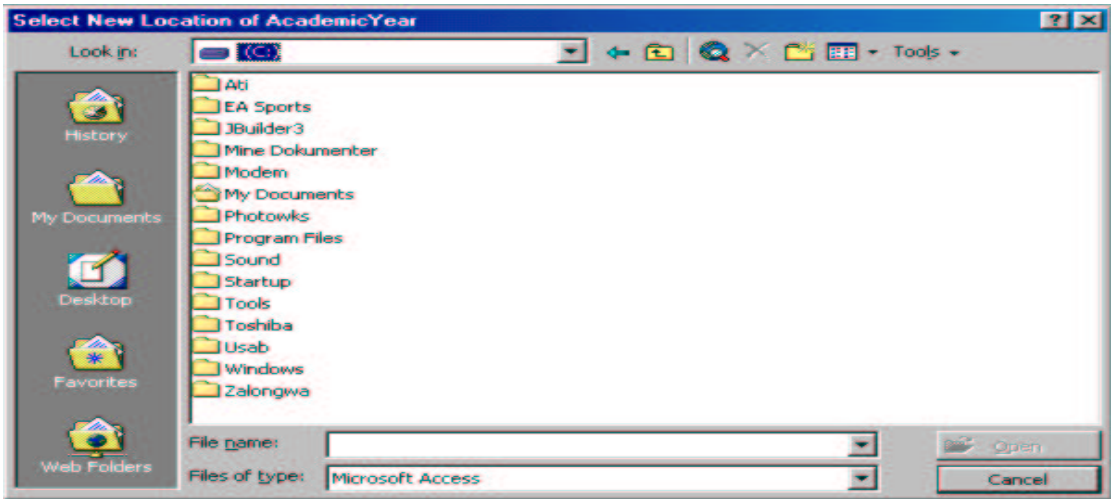
Zalongwa was developed to work in a Network Environment. It can connect its LUNGO.mdb database by using Network neighbourhood or via ODBC. Although LUNGO.mdb and Zalongwa were developed in Microsoft Access 2000, they are two different application Programs and thus Zalongwa needs to connect to LUNGO.mdb through network neighbourhood.

5.1 Connect Database Files:

Use this command to locate the database of which Zalongwa will use. By default Zalongwa connects the database LUNGO.mdb in the C:\Zalongwa\ directory.



To direct Zalongwa to a different location of the Database (LUNGO.mdb), Click the command “Select All” and then tick the checkbox labelled “Always prompt for new location” and click “OK”. Zalongwa will display the following screen:



In this way using other location of database could be easier if it is in a networked server.

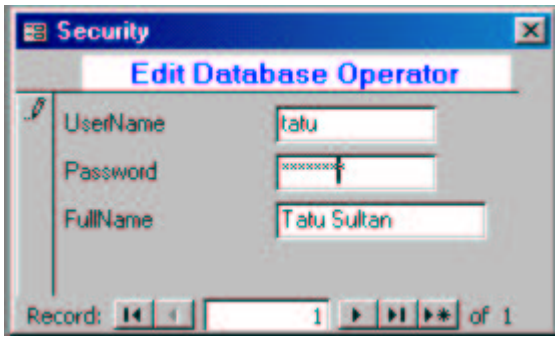
5.2 Edit User:

When one starts this program, Zalongwa asks for a user name and password. This command accepts logins for Database Administrators only.

Once the login of the Database Administrator is successful, Zalongwa will provide redirection form, which has two options “Edit Database Administrator” and “Edit Database Operator”.

The Database Administrator screen registers “Zalongwa Administrators”.

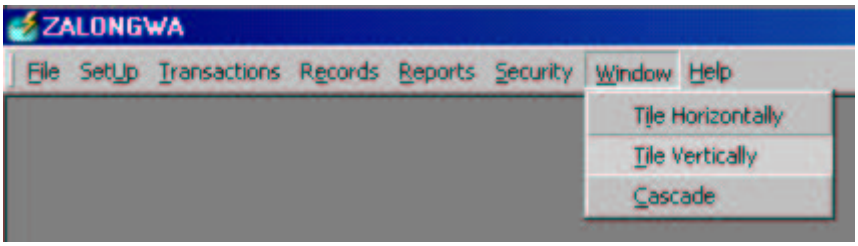
The Database Operator command registers “Zalongwa Operator”.



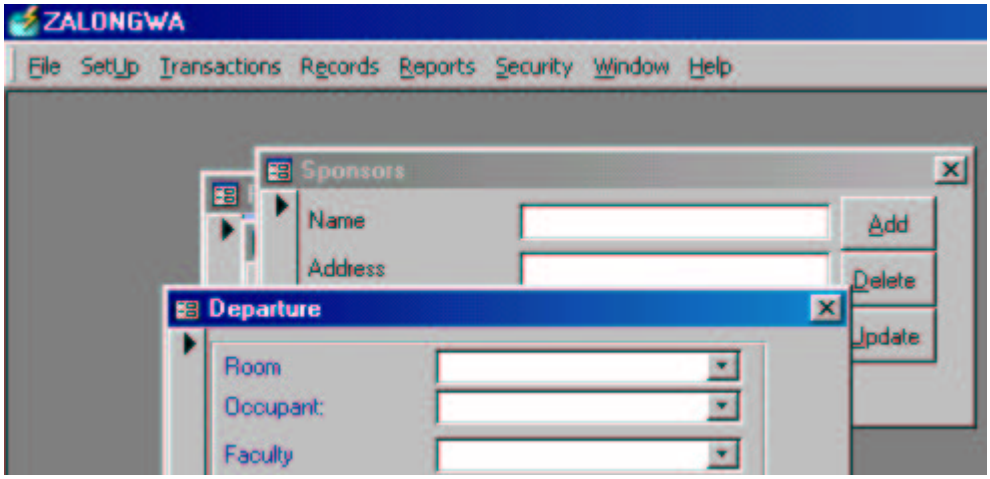
Zalongwa operators and administrators have to sign in order to use the program, otherwise Zalongwa will always refuse to login the users who have no rights to interact with the system.

6 THE WINDOW MENU

Zalongwa is a window-based system. In this way Zalongwa has many screens (Windows) of different sizes.
The Window menu provides commands for arranging these windows in such a way that, a user can see all of them at the same time.

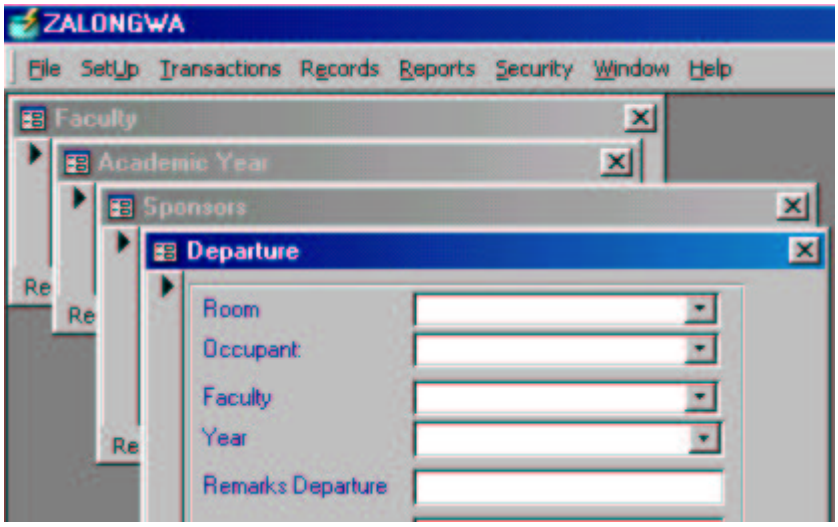


The commands are powerful and useful. Zalongwa users will find very efficient when they want to operate with many windows at the same time.



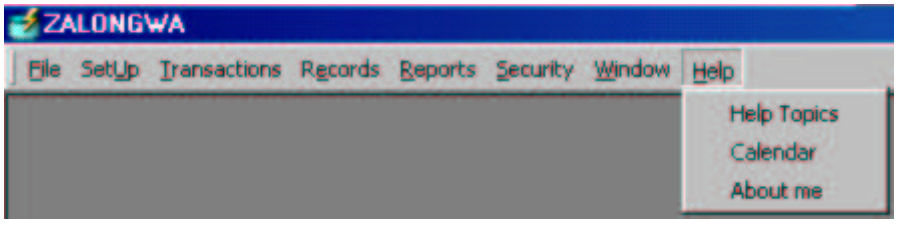
Before applying “Window – Cascade” command.

6.1 Cascade Command



Windows arranged by “Window – Cascade” command applied

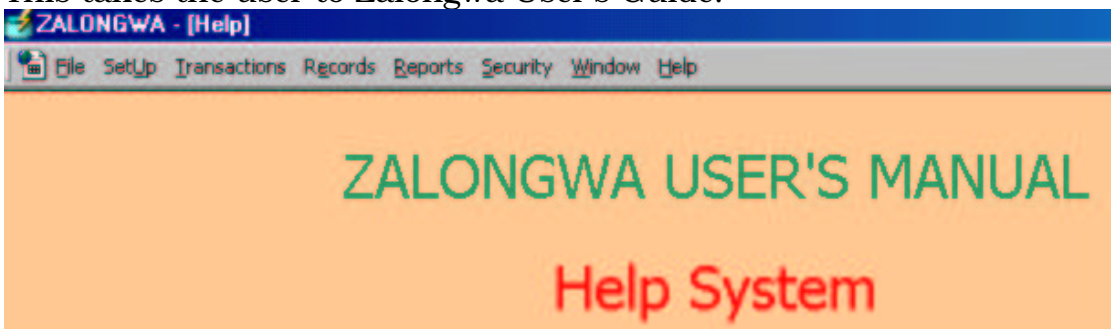
7 THE HELP MENU



Zalongwa User's Guide, Zalongwa Calendar and About Zalongwa documents are hound in the Help menu.

7.1 Help Topics

This takes the user to Zalongwa User's Guide.



7.2 Calendar

Zalongwa calendar is very powerful. Gives Calendar dates from 1900 to 2100. In the following screen Zalongwa Calendar display Mr. Lungo's birthday!
